

# Educational Garden Signs

Over many years of developing educational gardens, we realised the need for reasonably priced signs with accurate information and quality colour photos to guide better use and understanding of the plants.

Add to the educational value of your bush food or edible garden with our range of colourful plant ID signs, including scientific & common names, plant descriptions, growing tips and uses. Welcome visitors to your garden with a botanical art sign or a customisable version.

Signs are available in economical corflute or robust metal. Speak to us if you can't find the sign you are looking for! See [edibleeden.com.au](http://edibleeden.com.au) for more details.
